Greetings!

Thanks again for the interest, response and participation in the 2011 International Algae Competition. The exhibit section on [AlgaeCompetition.com](http://AlgaeCompetition.com) shows a summary of each entry on its own page. Some participants submitted videos, and these have been added to the Algae Competition You Tube Channel and are shown on exhibit pages. The jury process occurs over these next two months.

### Media Promotion Begins for the Algae Competition

Media

promotion for the International Algae Competition begins with "The Future of Algae", a 6 part series at [AlgaeIndustryMagazine.com](http://AlgaeIndustryMagazine.com).

We asked "How will algae change the world and improve our lives?" This article series explores the future of algae as seen through the prism of the entries from the International Algae Competition.

There are so many remarkable and creative entries in the competition. The series of six articles features some of the entries and the visions they represent for algae in our future with design ideas for algae production landscapes, sustainable and affordable algae production systems for medicines, food, feed, energy, nutrients, water remediation, carbon capture and new algae foods.

1. Future of Algae from the International Algae Competition

Registration

and Submission deadline was October 22, 2011. Jury process is underway.

### Competition Schedule

Finalists will be announced February 12, 2012, and jury will begin review for award winners. Major award winners will be announced March 12, 2012. \$10,000 cash prizes awarded.

Finalists will receive media recognition and will be included in books, publications and exhibitions around the world.

2. Eat: New Algae Foods and Recipes
3. Grow: Algae Production Systems
4. Dream: Algae Landscape and Architecture Designs (part 1)
5. Dream: Algae Landscape and Architecture Designs (part 2)
6. International Algae Exhibitions

### *Emerging Themes, Schemes and Dreams in Landscape Designs:*

- Regenerating the natural environment and restoring polluted landscapes
- Creating urban master plans and green water parks with algae production
- Innovating the traditional seaweed and marine algae industry
- Floating algae biofuel production farms along coastlines
- Capturing and reusing CO2 emissions in transport networks
- Enhancing quality of life and supporting communities in the developing world
- Designing living buildings and retrofitting buildings with photosynthetic membranes
- Fueling algae-based urban economies and eco-communities
- Showcasing algae parks for entertainment, education and recreation

### 2012 International Exhibitions

We are now prospecting public exhibition venues and sponsors for 2012 Algae Competition Exhibitions in museums, conference centers and universities around the world. These will be a multi-sensory experience of algae landscape and architecture designs on wall murals and video monitors, working models of algae systems, and algae food and beverages to delight the taste. Please contact us if you have recommendations, would like to participate, or would like more information about this program.

Best Green Wishes,  
Robert Henrikson and Mark Edwards for the International Algae Competition
